HM Engineering & Consultancy (Engineering)

PREFACE

HM Engineering & Consultancy is a company comprising a group of highly qualified Engineers who are dedicated to and specialized in the related field.

Technical know-how is an indispensable prerequisite for the successful implementation of all development projects. A lack of which is the number one constraint for all developing nations. Bangladesh, being one such nation, must utilize all locally available expertise for planning, designing, constructing, and evaluating its development projects.

Therefore, a good company should serve society as well as its clients. To attain this objective, HM Engineering & Consultancy was formed as a company in September 2018.

To assist the nation in all partial fulfillments of its task and responsibility related to the Construction, civil maintenance, Electrical Installation, Electrical Maintenance, Mechanical repair & Maintenance works, and Repair & Maintenance works throughout the whole country.

All members of this organization are highly specialized professionals with extensive experience in their respective fields over the years in the country. This firm provides services in the fields of Design, Planning, and construction of various civil, electrical, and mechanical engineering projects.

Civil construction is a very suitable work as it requires workmanship in civil, electrical, mechanical, and even acrobatics.

Our Engineers, Masons, electricians, and technicians are now quite dexterous in constructing standard construction within the stipulated time. Newcomers are being trained on the job and in the head office to carry out the bulk work. Loyalty to the clients is our basic strength of HM Engineering & Consultancy, which has given us the confidence to grow in our careers within this company.

Safe & Sustainable Design.

HM Engineering & Consultancy (Engineering)

Message from CEO

Greetings and welcome to **HM Engineering & Consultancy**. We are proud of the many great projects we have built in our short history. We have expertise with residential, commercial, industrial, institute, hospital projects, and vast experienced in detailed engineering assessment and renovation works. Please enjoy your trip around the touch of HMEC.

Our goal is to make the workplaces safer in Industrial, Commercial & Residential sectors. We are providing Electrical, Fire, Structural safety solutions for you. We have more than 17 (Seventeen years) of working experience in these fields. We have a group of professionals having vast similar experience to work on it.

We always say “**Hire a consultant, not a software**” as we believe that successful consulting is achieved through a balance of significant experience, a working knowledge of today's best practices, and access to cutting-edge technologies. We look forward to an opportunity to serve your building needs in the near future.

Sincerely,

Engr. Hasnat Ali

Rajuk Reg. Structural Engineer

HM Engineering & Consultancy (Engineering)

OUR AREA OF SERVICES

HM Engineering & Consultancy is a quality-driven engineering & architectural consulting company that offers well-defined, intuitive and accurate building design services to the client since our inception. Being a building design consultancy, highly qualified, skilled and technically sound professionals are our true assets! We provide feasibility study, detailed design services for infrastructure projects .

We follow international standards and codes for meeting your specific requirements. We provide the finest and thorough consultation for one-stop, comprehensive building design services, Including Architectural, Structural, Electrical, Plumbing, Fire-Fighting Design, Cost Estimation, Construction Supervision, and more, with the best competitive pricing in the industry.

Our fleet of architects, structural designers, planners, economists, analysts, detailers, draftsmen and professionals are truly aware about all the latest tools and technologies related 2D & 3D modeling and detailing. With the proper implementation of present-day technology, we give you exceptional drawings for long-lasting construction. Our strength lies in the breadth and depth of our technical expertise which enables us to provide practical solutions to the most complex challenges for clients in a number of sectors. We provide the following consultancy services for Building and Infrastructure design in Bangladesh.

- a. Architectural Design of Residential/Commercial/Industrial Buildings
- b. Interior Design, Branding and 3D Modeling
- c. Landscaping Design
- d. Structural Design of High-Rise Buildings
- e. Feasibility Study
- f. DEA (Detailed Engineering Assessment)
- g. RMG Factory Design
- h. Seismic Assessment & Retrofitting.
- i. Renovation and Rehabilitation
- j. Steel Structure Design
- k. Electrical Design
- l. Fire Detection and Protection Design
- m. Plumbing and Sanitary Design
- n. Drainage Master planning
- o. Construction Supervision
- p. BOQ, Estimate and Budget Preparation
- q. Project Evaluation

Safe & Sustainable Design.

HM Engineering & Consultancy (Engineering)

HMEC provides comprehensive consulting services for getting building plan approval from the following local authorities of Bangladesh:

1. RAJUK/CDA/RDA/KDA/COXDA
2. Pourosova
3. Civil Aviation
4. WASA
5. TITAS Gas Transmission Co.
6. DESCO/DPDC
7. City Corporation
8. National Housing Authority
9. DTCA (Dhaka Traffic Control Authority)
10. DMP (Dhaka Metropolitan Police)
11. Fire Department
12. Environment Department

CONSTRUCTION SUPERVISION

HMEC provides comprehensive construction management consulting services that provide the best results for your project. Our experts possess decades of engineering and construction experience and apply this knowledge to the everyday challenges that owners, contractors, engineers, and architects face throughout the construction process. Depending on your specific project needs and requirements, HMEC provides the following construction consulting services.

BOQ, ESTIMATE AND BUDGET PREPARATION

We are providing Quantity Surveying Services. With the help of our skilled civil engineers, we offer high-end Quality Surveying Services. These services are executed with the help of modern technology and strategically planned designs. Furthermore, the service that we put forth for our clients is easy to direct & execute. This service includes the following activities:

- a. Preparation of Bill of Quantities
- b. Verification of tender BOQ
- c. Material Take Off
- d. Bar Bending Schedules

Safe & Sustainable Design.

HM Engineering & Consultancy (Engineering)

MISSION & VISION

MISSION:

At HM Engineering & Consultancy (HMEC), our mission is to deliver exceptional design and construction services driven by creativity, innovation, and quality. We are committed to providing high-value engineering and consultancy solutions that meet the diverse needs of our clients. With a goal to become a leading global consultancy firm, HMEC aims to expand its reach across the world, setting new standards in excellence and customer satisfaction.

VISION:

Our vision at HMEC is to shape the built environment through advanced technology, earthquake-resilient design, sustainable construction practices, and human-centered architecture. We strive to create spaces that improve the way people live and work, fostering lasting connections and enhancing communities for generations to come.

Safe & Sustainable Design.

Our Core Services

Structural Design

Major field of our company

Structural Design is a major field for the company, and they have a significant amount of work in this area. The availability of their engineers helps keep the costs of this section low.

Architectural Design

Part & Parcel of our work

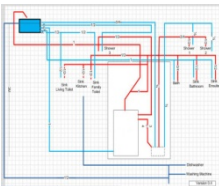

Architectural Design, which includes plan, elevation, & 3D modeling, is an integral part of their work. Their expert designers are highly interested in handling any architectural design and animation as per the client's requirements.

Electrical Design

Electricity supplement is not ignorable

Electrical Design is crucial, as proper electrical wiring is important for the safety and well-being of the building's occupants. The company's Electrical Engineers are ready to take on tasks in this field.

Plumbing Design

Beatification depends on the Plumbing works

Plumbing Design is essential, as it enhances the overall aesthetic of the design. The company suggests taking this task gently and operating it as per the design requirements.

Site Visit

Important for Quality control

Site supervision is crucial for quality control, so site engineers regularly visit and justify the work progress according to the design.

Soil Test

Necessary for Design

Soil testing is necessary for design, but it's challenging to determine the exact soil conditions due to formula variations. Any faults in the soil can impact the entire design.

Safe & Sustainable Design.
